

CAT40 Series Thermographer Gloves

PRODUCT PART NUMBER

CAT4-GLOVE-SIZE

Thermographer Gloves for ARC Flash Protection

PRODUCT DETAILS

Sizes – Regular, Large

Treated Cotton Blend Fabric

Fabric Content- 88% FRT Cotton, 12% Nylon

Fabric Color- Navy Blue

Calorie – 41 cal/cm² -PPE -4

PRODUCT DESCRIPTION

CAT40 Series offers maximum durability & protection.

FEATURES AND BENEFITS

Arc Flash Thermographer gloves are manufactured of fabric that has been tested according to ASTM F1959 to provide protection against the heat energy of an Arc Flash incident. Like the Arc Flash garments that are used in this application, the fabric provides some level of insulating protection against the arc flash energy. Again, like the Arc Flash suits, they are rated to reflect the level of protection offered.

FLAME RETARDANT TREATED (FRT) FABRIC such as cotton has been treated with a flame-resistant chemical that is a chemical has been applied to the surface of the fabric so that it becomes resistant to flame. The flame- retardant chemical may be washed out if improperly laundered.
