

SWIVELS

Our anodized aluminum swivels are available in two sizes to allow users to select the strength, weight and dimensions best suited to their specific needs. Whether used in a rescue haul system, helicopter operations, or rope access, the addition of a swivel can help prevent system lines from wrapping around each other, while at the same time reducing spin caused by loading a free-hanging rope.

Rescue Swivel – Lightweight and high strength, this standard-size swivel for litter systems features symmetrical holes to accommodate multiple carabiners. High-speed, multi-axis CNC machining delivers a full-featured swivel at a reduced price for the best value in the industry.

ProSeries® Swivel – Designed to repeatedly perform at high loads, this larger swivel’s special bearing supports a much higher working load than other swivels without damage to the bearing — perfect for heavy system loads. The larger size makes it compatible with helicopter short haul line equipment.

Option	Rescue
Item	300721
PRODUCT WEIGHT	125 G (4.4 OZ)
LENGTH	95 MM (3.75 IN)
COLOR	SAND / SLATE
NFPA RATING	GENERAL USE
3 SIGMA MBS	36 KN (8,093 LBF)
Price	\$79

Option	ProSeries
Item	300701
PRODUCT WEIGHT	184 G (6.5 OZ)
LENGTH	114 MM (4.5 IN)
COLOR	RED / SLATE
NFPA RATING	GENERAL USE
3 SIGMA MBS	47 KN (10,566 LBF)
Price	\$113
