

Glove Guard

Simple Tools With Unique Designs

New Metal Detectable Products!

Metal Detectable
Glove Guard®
Clip

Glove Guard is proud to introduce metal detectable products for use in the food industry to safely keep your gloves close at hand.

The Glove Guard® and Utility Guard™ lines feature the patented safety breakaway that prevents the user from being pulled off balance if their gloves snag in a piece of equipment. The Handi Klip® device uses a ball and socket that is designed to break away at a higher point.

Use of the Glove Guard products have proven to drastically reduce hand injuries and glove replacement costs and all three products can be imprinted with your company logo or safety slogan to further increase your Return On Investment.

Metal detectable requirements vary. Therefore free samples of our metal detectable products are available upon request for independent testing for compliance to your company's specifications.
