

Light Duty

Special Purpose

HyFlex®

ADVANCED MECHANICAL PROTECTION

11-101 TOUCH SCREEN CAPABLE GLOVES

Touch screen precision and contact

The HyFlex® 11-101 and 11-105 gloves deliver the perfect solution for people operating touch screens at work. The gloves are made out of a conductive yarn enabling interaction with a touch screen and providing the necessary precision and sensitivity.

The polyurethane coating allows the fingers to slide gently over the screen. The 11-101 is palm dipped for optimum mechanical resistance, and the 11-105 is finger dipped for improved comfort, fit and flexibility.

Both these gloves provide comfort with their breathability, tactility and flexibility achieved by a textile liner made of high-tenacity polyamide continuous thread.

Industries

- Automotive manufacturing
- Construction
- Industrial and consumer goods manufacturing
- Life science manufacturing
- Life science testing labs
- Transportation
- Warehousing and logistics

Applications

- Inventory / storage management
- Machine/device operations
- Maintenance and repair
- Order entry
- Quality assurance
- Package delivery and handling
- Project management
- Receiving goods and items

Performance Profile

Conductive yarn

For industrial workers in environments with touch screens, Hyflex® 11-101 and 11-105 are the gloves with advanced mechanical performance that allows them to operate these devices without having to constantly don and doff their gloves.

Polyurethane coating

Enhances the sliding and finger movements on the screen

High tenacity polyamide continuous thread

The high-tenacity polyamide continuous thread knitted in a seamless non-stop process used to make the glove ensures breathability and therefore all-day comfort along with the tactility you need to handle smallparts.

Key features

Palm dipped or finger dipped

Two styles to answer specific needs: 11-101 palm dipped for higher mechanical resistance, 11-105 finger dipped with non-coated palm for increased comfort and fit.

Mechanical protection 11-101

EN abrasion level 3 (ANSI level 3) and

EN cut level 1 (ANSI level 1)

Mechanical protection 11-105

EN abrasion level 1 (ANSI level 3) and

EN cut level 1 (ANSI level 1)

Combination with disposable gloves

The 11-105 finger tipped glove works well combined with single use disposable gloves to operate touch screens

Dirt masking colors

Grey coating on grey liner hides dirt

Comprehensive sizing

Sizes 6-11 ensure optimal dexterity and comfort for every employee
