

FH22 HOOD

DISPOSABLE, ONE-SIZE-FITS-ALL PERSONAL PROTECTION

The Scott FH22 Hood is an innovative loose fitting hood that, when combined with Scott's Proflow 3 Powered Air-Purifying Respirator and the appropriate cartridge or filter, affords NIOSH approved, extended duration respiratory protection in non-IDLH (Immediately Dangerous to Life & Health) environments. Exclusive to the FH22 Hood is a one-size-fits-all design that features a patented quick-draw adjustable harness assembly for easy donning and doffing.

The loose fitting design of the FH22 Hood helps to extend worker safety to all employees by accommodating individuals with prescription eyewear, facial hair and trendy hair styles, while also eliminating the need for costly fit testing. Because it is disposable, the FH22 Hood eliminates time consuming decontamination.

Scott's FH22 Hood offers a double bib configuration for added protection. This feature allows the wearer to tuck the inner bib into a protective garment, while the outer bib is designed to provide additional protection from particulates & chemicals. A disposable hose shroud that provides added protection to the breathing tube, is also available.

No matter what the size, Scott's FH22 Hood offers the perfect fit.

PRODUCT HIGHLIGHTS

- One-size-fits-all design
- Patented unique, adjustable harness assembly
- Provides a 1000 APF (Assigned Protection Factor)
- Constructed of Tychem QC
- Accommodates prescription eyewear and facial hair
