

Mitten made of HT-fabric with special insulation

H3110030

These gloves are made of soft HT-fabric and are ideal for the working with hot glass up to 500°C. Especially the weight of the workpiece is important, because it influences the flow rate of the heat inside the glove. Due to the individual construction, the gloves have a double lifetime, because of double sided usage and are therefore cost-saving.
Application area: transport hot glass, working in the glass industry, laboratory, furnaces, etc.

- Soft, flexible
- Don't sticks on glass
- Can be used on both sides
- Double insulated
- Length 300 mm
