

**Heat protection frontal coat
made of Preox-Aramid fabric (KA-2)
aluminized**

**JUTEC®-item number:
HSFM130KA-2**

Aluminized frontal coats also known as „Flämmermäntel“, covers the employee depending on the length-mass up to the shinbone. The standard coat has a closed front area with Velcro on the back.

Due to the open back there will be an air circulation; a high mobility is guaranteed.

Application area: aluminum-, steel- and glass industry, welding industry etc.

- Flexible fabric
- Very comfortable to wear
- High heat reflection
- Velcro on the back part
- Length: approx. 1300 mm
- Also available in 120's and 140's length
- Other fabrics (KA-1, KA-9) available
