# **RAEGuard 3**

RAEGuard 3 Series is Honeywell's masterpiece detector of toxic and flammable gas that represents advanced technology and development potential in the future. It provides users with safer, more stable, more reliable and more effective field transmitter, and can be applied in indoor and outdoor hazardous environments, to monitor the dangerous degree of hazardous gases in real time, so as to rapidly and effectively protect the safety of the installation site and production personnel.

The core of RAEGuard 3 - the sensors passed through strict selection and can ensure reliable and stable operation of the transmitter. Combustible gas detector uses catalytic sensor technology with long life (> 5 years) and high antipoisoning. Toxic and Oxygen detectors adopt a variety of compensatory electrochemical sensor technology, especially Oxygen detector can avoid zero-free (nitrogen) calibration. At the same time, NDIR infrared detection technology with long life, anti-poisoning and Oxygen-free NDIR infrared detection technology allows RAEGuard 3 to be used in a wider and more harsh gas detection environment.

 $\overline{\bullet}$ 

## To Your Safety -

- All adopt advanced sensor technology
- Wider compensation for temperature and environmental factors keeps the instrument reliable and stable.
- Redundant design to ensure no "false alarm"
- Clear indications of status can perceive the degree of environmental hazards even at long distances.
- Optional integrated visible and sound alarm, light and sound constantly remind, alarm signal will not be ignored
- Optional built-in surge protection device to make sure outdoor installation of "worryfree"
- IP66/67
- TUV SIL2

#### Self-Management

- Life expiration reminder
- Calibration period expiration reminder
- Alarm, STEL/TWA, fault, warning and other event reminders
- Fault code reminder

#### Universal Transmitter

- Simplified and reduced cost of installation
- Decreased material management
- Reduced user's spares and training
- Minimal maintenance required

### Easy to Use

- Easy read backlit LCD with text, bar graph, digits and icons, support EN and CN
- 3 high-recognized and visible LED status indicators
- 3-wire 4-20mA current output can be fine-tuned to avoid the signal attenuation caused by wiring
- Optional HART<sup>®</sup> communications as standard for remote diagnostics/configuration
- Optional Bluetooth® for easy remote operation and maintenance via mobile app
- RS485 Modbus RTU for multi-drop networking and remote real-time monitoring
- Local or remote sensor installation options

# **Cost Effective**

# Easy to Install

#### Certification

- EU: CE, EMC, ATEX
- IECEx
- TUV SIL2

#### **Applications**

- Oil & Gas
- Chemical industry
- Oil & Gas Storage and
- Transportation
- Food/beverage
- Refineries
- Power plants
- Steel plants
- Laboratory
- Waste water facilities
- Utilities
- Pharmaceutical plant
- Chemical Storage
- Automotive industry

RAEGuard 3 Gas Detector	
Use	Universal transmitter with standard configuration of applications for the detection of flammable, toxic and
Electrical parameters	
Input Voltage Range	16-32VDC (24VDC nominal)
Max Power Consumption	Electrochemical Cells: 5.5 watts; Catalytic or NDIR: 7.
Current Output	Completely configurable 4~20mA (source type) with output.         1mA       Fault         2mA       Inhibit (during configuration or 3mA         3mA       Warning         4mA~20mA       Normal         22mA       Overrange         Note: When the current output is less than 3mA, HAR
Terminals	5 terminals (14 terminals for use with relay output), v
Relays	3 x 2A@30VDC. Selectable normally open or normally Alarm relays default energised/non-latch. Fault relay
Communication	RS485, Modbus RTU Optional Bluetooth
Construction	
Transmitter Housing Material	Aluminum Alloy or 316 Stainless Steel
Sensor Housing Material	316 Stainless Steel
Weight (Approx)	Aluminum Alloy: 3.0kg; Stainless Steel: 5.0kg
Mounting	Integral mounting plate with 4 x mounting holes suit
Entries	2 x 3/4" NPT cable/conduit entries and 1 x M25 ser rating
Entries Performance****	2 x 3/4'' NPT cable/conduit entries and 1 x M25 ser rating

# Installation

RAEGuard 3 Series detector is designed for use in potentially explosive atmosphere. The installation of detectors should ensure their explosion-proof performance and strictly follow the relevant national standards, to use industrial-grade armored cables and explosion-proof glands and conduits.

Use 0.5mm2 (20AWG) to 2.5mm2(13AWG) cross sectional area cable as needed to ensure minimum operating voltage at the detector, depending on installed cable length.

## **Other Accessories**

Sunshade/delug

Collecting Cone

Gas Flow Adapter

Mounting Plate Kit

# Electrical

RAEGuard 3 transmitter only provides source current output. The maximum supported cable length can refer to the recommended values in the User's Manual.
