

Industrial **Hearing Protection**

WE KNOW WHAT'S AT STAKE.

Industrial Hearing Protection and Communication Systems

MSA has an impressive line of hearing protection and communication system products for nearly every industrial application. In fact, MSA offers what customers want most: economical options, quality, and outstanding performance.

left/RIGHT® Hearing Protection 11

Noise Reduction Rating (NRR) describes average sound level reduction (attenuation) provided by hearing protectors within a laboratory setting. Because NRR reflects lab (and perhaps not real-world) usage, the Occupational Safety and Health Administration (OSHA), recommends de-rating the NRR to help account for incorrect fit and inconsistent wear time on worksites. OSHA’s methodology for Estimating Hearing Protector Attenuation²:

- 1. 8-hour Time Weighted Exposure (TWA) = 94 dBA
- 2. NRR of hearing protector = 31 dBA
- 3. Subtract 7 dB from the NRR = 31 dB – 7 dB is 24 dB
- 4. Reduce value by 50% = 12 dB
- 5. Subtract this value from the TWA = 82 dB (Estimated Protection)
- 6. Decide if Estimated Protection works for your environment!

¹Encyclopedia of Environmental Health, “Effects of Low Frequency Noise and Vibrations: Environmental and Occupational Perspectives,” J.O. Nriagu, K.P. Waye, 2011.

Helmet-Mounted

left/RIGHT® Helmet-Mounted Hearing Protection for MSA *Slotted Cap-Style* Helmets

MSA left/RIGHT earmuffs are different from any other on the market: the cups are designed to account for the asymmetrical position of each ear on the head. MSA left/RIGHT cups can be adjusted to the angle of the ear, and also independently raised or lowered.

Markets: General industry, manufacturing, repair and maintenance, construction, OGP, forestry, shipbuilding, mining

Applications: Heavy mechanical industries, compression rooms, airports (HIGH)

Utilities, construction, general industry (MEDIUM)

Food manufacturing, automotive, light industry (LOW)

Standards: Meets ANSI S3.19-1974 and CSA Class A Standards

Compatible PPE: V-Gard Slotted and Universal Frames—no additional parts needed

Low Frequency Noise (LFN, 20–200 Hz) in work environments is the irritating, throbbing “background noise” emitted from sources such as road vehicles, aircraft, and ventilation or air conditioning units.

Poor worksite acoustics, coupled with a multitude of LFN sources, creates adverse health effects such as headaches, unusual tiredness, lack of concentration, irritation, and reduced work output¹. Reduce effects of these by selecting hearing protection designed to eliminate LFN.

Economuff Hearing Protection

- Markets:** Repair and operation (MRO), mining, food and beverage manufacturing, metalfabrication, oil & gas, general manufacturing
- Applications:** Facility maintenance, grinding, machine operations, sanding, welding, demolition, painting, assembly, cleaning
- Compatible PPE:** MSA Helmets¹
- Standards:** Meets ANSI S3.19-1974 and CSA Class B Standards

	Product Name	Part No.	NRR	Product Features
	Econommuff Multi-Position	10061273	23 dBA (under chin/ behind head) 24 dBA (over the head)	<ul style="list-style-type: none">• Offers three positions: under the chin, behind the head or over the head• Under the chin or behind the head positions allow use of head protection• Durable design for use in tough environments• No metal parts• Padded headband makes longer wear possible• One size fits most
	Econommuff	10004291	24 dBA	<ul style="list-style-type: none">• Soft wide cushions maintain comfortable pressure around the ears• Lightweight• One size fits most• No metal parts• Most economical option

An earmuff's attenuation depends upon the muff's fit against the head and around the pinnae (i.e., seal tightness). Gaps, including those caused by safety glasses, provide an easy path for sound to travel, reducing protection levels. To reduce this effect, try not to put anything under the cup (such as pencils, hair, etc.). But if you must wear protective eyewear, select either those items with a thin strap or very thin temple. If the gap is noticeable, the protection level is compromised.

¹Econommuff multi-position worn in behind-the-head or under-the-chin positions only.

Headbands

SoundControl® Classic Hearing Protection

Markets: General industry, manufacturing, repair and maintenance, construction, oil and gas, forestry, shipbuilding, mining, metal processing, automotive

Applications: Confined space, sanding/grinding, power tool use, occupations with non-impulse noise (such as machine operations), demolition, assembly

Standards: Meets ANSI S3.19-1974 and CSA Class A Standards

	Product Name	Part No.	NRR	Product Features
	SoundControl HPE	10061271	26 dBA	<ul style="list-style-type: none"> • Lightweight, low-profile earmuffs are ideal for a variety of noisy applications • High attenuation and excellent sealing for reliable protection • Headband design and two-point cup mounting distributes weight evenly, offering outstanding balance and comfort • No metal parts • Cups can be moved to a range of wearing positions for a custom fit
	SoundControl EXC	10061229	24 dBA	<ul style="list-style-type: none"> • For use with MSA non-slotted full brim hats • Requires drilling into the helmet to mount the muffs • The ANSI/ISEA Z89.1 class rating of a drilled helmet is Class C

MSA—The Safety Company

Our business is safety. We've been the world's leading manufacturer of high-quality safety products since 1914. MSA products may be simple to use and maintain, but they're also highly sophisticated devices and protective gear—the result of countless R&D hours, relentless testing and an unwavering commitment to quality that saves lives and protects millions of hard working men and women each and every day. Many of our most popular products integrate multiple combinations of electronics, mechanical systems and advanced materials to help ensure that users around the world remain protected in even the most hazardous of situations.

Our Mission

MSA's mission is to see to it that men and women may work in safety and that they, their families and their communities may live in health throughout the world.

MSA: WE KNOW WHAT'S AT STAKE.

Note: This Bulletin contains only a general description of the products shown. While product uses and performance capabilities are generally described, the products shall not, under any circumstances, be used by untrained or unqualified individuals. The products shall not be used until the product instructions/user manual, which contains detailed information concerning the proper use and care of the products, including any warnings or cautions, have been thoroughly read and understood. Specifications are subject to change without prior notice.

MSA operates in over 40 countries worldwide. To find an MSA office near you, please visit **[MSAsafety.com/offices](https://www.MSA.com/offices)**.
