3M™ Helmet Integrated Safety Glasses V9 Series

**Convenient and compatible comfort
for combined protection**

The need to wear multiple pieces of personal protective equipment can be cumbersome and uncomfortable. The new 3M™ Helmet Integrated Safety Glasses V9 Series helps combat these issues. Three pivoting adjustment points allow for positioning to suit a range of face shapes and sizes and enable the safety glasses to be stored inside the helmet to protect them from damage during storage or when eye protection is not required.

The eyewear can be used at the same time as most face shields when continuous eye protection is required but face shields are not in constant use. Designed without traditional temple arms, the helmet integrated safety spectacles will not interfere with the acoustic seal of 3M helmet mounted earmuffs.

3M™ Helmet Integrated Safety Glasses V9 Series

Designed with a toolless clip-on attachment to connect to the headband of a helmet or hard hat, the V9 safety spectacles are made to be fitted to the 3M™ SecureFit™ Safety Helmet X5000 Series as well as the 3M™ H-700 and H-800 Series of Hard Hats. This eyewear is easy to adjust and retracts neatly between the hard hat shell and suspension when not in use.

Compatibility

- ▶ Attaches directly to safety helmet suspension
- ▶ Without traditional temple arms, the helmet integrated safety glasses will not interfere with the acoustic seal of helmet mounted earmuffs

Convenience

- ▶ Retracts between safety helmet suspension and shell, helping to protect the lens when not in use
- ▶ New improved nose bridge design adds extra protection for the lenses, preventing scratches from the helmet
- ▶ Anti-Fog coated lens

Comfort

- ▶ Increased link friction provides even more secure positioning*
- ▶ Three pivot adjustment points allow easy maneuvering and adjustment for closeness and height
- ▶ Designed to be lightweight on nose

*When compared to 3M™ Safety Glasses HIE6 Series

Available in a variety of colorful styles.
