

Heat protection jacket
made of Preox-Aramid fabric (KA-1)
aluminized
JUTEC®-item number:
HSJ080KA-1

Aluminized heat protection jackets cover the employee up to the trouser pockets.

The standard jacket features a covered central heat resistant Velcro fastener and a stand-up collar with insulated press button. The smooth surface allows a high level of reflection, the extreme softness of material a perfect fit.

Application area: aluminium-, steel-, copper-, glass-, chemical industry etc.
