

Technical Specification

Product Reference:

HAR11MFB

Designation:

Full body harness

Description:

1 fall arrester anchorage point harness (back).

2 adjustment loops.

According to EN361 Specification

Size:

GT - S/M/L, XX - XL/XXL/XXXL

Material:

Polyester. Webbing width - 45mm

Color:

Orange

Instruction for use:

- ✓ It is important to study each work situation and that each user is fully trained in different techniques in order to know the limits of the various devices.
- ✓ This product is inseparable from a comprehensive fall protection system (EN363), whose function is to minimize the risk of body injury from falls.
- ✓ The fall arrest harness (EN361) is the only body grip to be allowed for use with a fall arrest system.
- ✓ It must be connected to the fall arrest system by connectors (EN362).

Limits to use:

- ✓ Textile products or those containing textile elements (harnesses, belts, shock absorbers etc...): maximum life of 10 years in storage (from date of manufacture), 7 years after the first use.
- ✓ The shelf life is given as an indication. The following factors can cause it to vary greatly:
 - Non-compliance with the manufacturer's instructions for transport, storage and use
 - "Aggressive" work environment: marine atmosphere, chemicals, extreme temperatures, sharp edges.
 - Particularly intensive use
 - Shock or significant constraint
 - Disregard for the product item's history.
- ✓ If in doubt, always remove the product for it to undergo either:
 - a review
 - destruction
- ✓ The shelf life is not a substitute for periodic verification (minimum annually) which will assess the condition of the product.

HAR11MFB

Instructions for storage:

During transport and storage:

- ✓ Keep the product in its packaging.
- ✓ Keep the product away from any sharp, abrasive, objects etc..
- ✓ Keep the product away from sunlight, heat, flames, hot metal, oil, petroleum products, harsh chemicals, acids, dyes, solvents, sharp edges and structures of small diameter. These items can affect the performance of the fall arrest device.
- ✓ After use, store the product in its packaging in a cool, dry, ventilated area.

Instructions for cleaning/maintenance:

- ✓ When dirty brush with water and soap. The harness should be then wiped with a dry cloth and hung up in a ventilated room.
- ✓ Coat metallic parts with Vaseline oil soaked cloth.
- ✓ Bleaching agents and detergents are strictly forbidden.

Recommended Accessories:

- Energy absorber with single lanyard and connector
- Energy absorber with double lanyards and connectors
